Format: R0-550 can  
Net weight: 550 g  
Drained weight: 350 g  
Units per box: 12

# WHITE ★ TUNA ★ -IN OLIVE OIL-

The White tuna (Thunnus alalunga) is the most valued fish in Northern Spain. There are plenty of small fishing boats that every day arrive to the Cantabrian Sea ports to auction the fish.

We acquire the fresh white tuna in Gijón and Avilés' fish markets, so we can work it on it at its best. From July to September, the white tuna season becomes a major economic and social event in all the fishing villages from the Cantabrian Sea due to the artisan, seasonal and line fishing.

## WHITE TUNA IN OLIVE OIL

Format: R0-70 can  
Net weight: 67 g  
Drained weight: 45 g

Net weight: 115 g  
Drained weight: 81 g  
Units per box: 12

# OUR PASSION AND DEDICATION

Agromar, with its more than 50 years of experience, keeps providing the best quality in canned fish and ready meals. The history of our company goes back to 1948, when Armando Barrio Mata had the original idea of canning the sea urchin roes, very abundant in the Asturian rocky coast and beaches.

It was initially destined for family consumption, but the unique product did not last to show great marketing possibilities that Armando identified and developed some years after.

Back to those years, there were a lot of little artisan canning factories spread in all the Cantabrian coast. The same happened with Armando's father, that owned a canned fish factory in 1926, not under Agromar's brand.

In 1968 Armando registers the brand and, 21 years later, creates Conservas Agromar, a young and innovator public limited company.

# A LEADER COMPANY AND IN CONSTANT EVOLUTION

New times, ideas and needs have impulse the constant grow of Agromar in the last decades, handling new challenges and facing new international markets with illusion.

The success of Agromar's products and its clear positioning in the gourmet segment have made our preserves to be present in the most select restaurants and delicatessen stores in Spain, France, Italy, Germany, United Kingdom, Mexico, USA, Panama and Hong Kong, amongst others.

# ★ CANTABRIAN SEA ANCHOVIES ★ -IN OLIVE OIL-

The Cantabrian Sea anchovies (*Engraulis encrasicolus*) are, without a doubt, the most recognized ones in the world. In Agromar we just use Cantabrian Sea anchovies from spring campaign, the moment it arrives at its best to our Sea.

Once it arrives to our factory, we introduce it in salting in barrels to be aged for 9 months, minimum. After that, we peel and fillet them to be introduced in cans or crystal jars covered with olive oil.

The size of the Cantabrian Sea anchovies is not related with its flavour, but with its presentation. It is the kind of species, origin and aging time, the factors that determine the quality.

**CANTABRIAN SEA ANCHOVY FILLETS**  
IN OLIVE OIL  
(100-110 Fillets)

# THUNNUS ALBACARES

# PÂTÉS

As an evidence of Agromar's innovative spirit, we launched in the early 90's a fish and seafood pâté range, which were unknown products at that time. Their fast success has allowed us to be present in all the national Spanish market as well as part of the world.

Our pâtés are made with olive oil, natural raw materials, with no preservatives. We offer nine different varieties.

# ★ HORECA ★

Our vocation is to guarantee the maximum quality in our products, with the best fish and seafood and always in olive oil.

We produce fresh tinned white tuna from the Cantabrian Sea, acquired in the local fish markets of Gijón and Avilés in the summer season. Also the Cantabrian Sea anchovies in the spring season, the moment the anchovy is at its best. Furthermore, we work with the best quality of wild yellowfin tuna, handmade and in olive oil.
